Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

I. Rejections:

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-10 and 13-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Diachi, Pharm. Co, (JP 11-228491) as applied to claims 1-10 and 13-15 above, and further in view of Ishihara, et al.

Applicants claim a process for preparing cyclopropanecarboxylate from a cyclopropane acid and alcohol in the presence of a group 4 metal catalyst.

Determination of the scope and content of the prior art (MPEP §2141.01)

(a) Diachi teaches a method of producing a cyclopropane carboxylate from a cyclopropane acid and alcohol in the presence of an acid catalyst. See page 1 of translation, paragraph [0021].

Art Unit: 1626

(b) Ishihara, et al teaches that direct condensation of carboxylic acids with alcohols to carboxylates in high yield may be achieved by employing a group 4 metal catalyst such as Hafnium, Zirconium, etc. See page 1140, 1st and 2nd columns.

Ascertainment of the difference between the prior art and the claims (MPEP §2141.02)

The difference between the prior art and the instant claims is that the Diachi reference does not teach the process of cyclopropanecarboxylate from an cyclopropane acid and alcohol **in the presence of a group 4 metal catalyst.**

Finding of prima facie obviousness---rationale and motivation (MPEP §2142-2413)

However, it would have been prima facie obvious for one of ordinary skill in the art at the time of the filing of the instant application to be motivated to employ the process as disclosed by Diachi and modify it by reacting the acid with the alcohol in the presence of a group 4 metal catalyst such as Hafnium or Zirconium as disclosed by Ishihara, with the expectation of obtaining a higher yield of carboxylate as is suggested by Ishihara.

II. Objections:

Claims 11-12 and 16-17 are objected to as being dependent on rejected base claims and would be allowable if rewritten in independent form.
